

The End of the Stock Market?

After the really bad first 6 months, of this year, the Stock Market (July-August 2022) had some steam and a rebound for investors. President Joe Biden boldly announced there is “no inflation”, when of course, there were clear indications the country was experiencing inflation. On Monday, August 29, 2022, Federal Reserve Board Chairman J. Powell announced the Feds will rethink interest rate and recession probabilities. This of course caused the stock market sell off on Monday and Tuesday.

But where does the stock market really stand? Is there going to be a crash this year or next year? The Kerry Theory, www.kerrytheory.com has spent countless hours searching for patterns that continually repeat themselves and cause the same conditions to occur.

How do we know if there are set-patterns for everything, or is just everything happening at random? Plants, animals, geological processes, the weather, physics (matter and energy) have clear set-patterns. When a pattern occurs you document it, and when it occurs again, and you have the exact same outcome, it may become important. When the pattern continually produces the same outcome, you now have a theory. Welcome to the Kerry Theory. The planets in our Universe have many purposes including producing certain influences.

Mars is an energy source which produces either great benefit or destructiveness depending on the angles to certain locations. For example, transiting Moon and natal Mars when transiting in the same SIGN, within 3.5-degs of each other, causes panic, frenzy, madness, and extreme emotions when connected by aspect 90 or 180-degree angle to some outer planet. Do these planets work together enough of the time which would enable us to determine the extreme highs and lows? This document will show this is the case with the Stock Market.

It seems when something cannot be explained, brilliant people say it was just a coincidence. Well below is another remarkable coincidence! You tell me what are the odds? The documented dates below are not made up to show the “Kerry Theory” is operating; this is documented history, you can look up the dates yourself!

October 28, 1929, Black Monday, the **Stock Market crash** begins. Notice transiting Moon 18 **Virgo**, natal Mars 18 **Virgo**, or sharing the same SIGN, and both natal Mars and transiting Moon are 90-degs to transiting Jupiter and within 3.5-degs of each other. Jupiter rules over investments, banking, financial matters and large-scale situations.

On October 28, 1929, or Black Monday.

On **March 16, (Monday) 2020**, the NYSE lost **2,997.10 or -12.93 percent of its value in just one day**; the market was suspended several times. What caused such a collapse to happen occurred the day before actually on Sunday, March 15.

This day, March 15, was a turning point in American history as the CDC told the public of the new emergency health guidelines; New York City shut down America's largest school district; restaurants across the nation closed, **normal life came to a halt** and everyone was beginning to brace for the COVID virus. However, something else was also occurring timing wise in our universe; the alignment of the planets telling us the Stock Market was going to take another hit. Transiting Moon 90-degs natal Mars and both natal Mars and transiting Moon "negative" by angle to transiting Neptune.

Coincidence or is there a connection? The Moon and Mars sharing the same SIGN or aspecting 120 or 90 or 180-degs is more than a coincidence. Moon and Mars obviously plays an important role of stirring up emotions, which leads to a frenzy, a panic nature, when they have "negative" aspects. The transiting Moon is in the sign of Virgo 12 times each year, but not often within 3.5-degs of either Jupiter, Saturn or Neptune when these planets are in Gemini, Sagittarius, or Pisces and a 90 or 180-degree angle. Why are Jupiter, Saturn and Neptune in either Gemini, Sagittarius, or Pisces important?

The beginning date of the New York Stock Exchange was May, 17, 1792, and it is this date which tells us what planets were "positive" and "negative" during that time period. Positive side to the left colored in green, negative side to the right colored in red. Astrology has been considered for entertainment only; not an exact science like astronomy. But what is astronomy? It's a science that seeks to explain what we observe in the Universe. This is what astrology has been trying to do for centuries but with little success due to no actual rules. Well we have rules now. We are beginning to see **factual evidence** that the arrangement of the ever-moving planets affects plants, animals, humans, geological processes, the weather and so forth.

May 17, 1792

N.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep	S.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep
2.23	5.48	15.15	18.74	19.54	22.95	23.52	23.80	26.38	27.27	27.71	2.23	5.48	15.15	18.74	19.54	22.95	23.52	23.80	26.38	27.27	27.71
Lib	Tau	Leo	Vir	Ari	Lib	Aqu	Tau	Ari	Tau	Lib	Ari	Tau	Leo	Vir	Ari	Lib	Aqu	Tau	Ari	Tau	Lib

When you look above at the chart, you see Uranus is colored green because the natal Moon and Uranus are 120-degs. Saturn is colored yellow because Saturn shares the same SIGN as the natal Moon, which means it can be either "positive" or "negative"; planets in the same SIGN only need direction for the energy to flow and they get this by the 120-degs "positive" aspect or the 90 or 180-degs "negative" aspects, being in the same SIGN is just like wiring that needs a connection. On the QUAD side ("negative" side), you see the Moon was 180-degs Jupiter and Neptune with Saturn being in the same SIGN as the natal Moon. Natal Venus might also be in the same SIGN as natal Moon but since the exact time is unknown this natal planet was deleted from the initial examination.

Only fast-moving planets can cause an event to occur, and in the NYSE chart, you now need to know which fast moving planets are important. Natal Mars is without question the strongest natal inner planet. Why? Natal Mars is 120-degs to Mercury and the Sun or increasing their strength.

May 17, 1792

N.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep	S.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep
2.23	5.48	15.15	18.74	19.54	22.95	23.52	23.80	26.38	27.27	27.71	2.23	5.48	15.15	18.74	19.54	22.95	23.52	23.80	26.38	27.27	27.71
Lib	Tau	Leo	Vir	Ari	Lib	Aqu	Tau	Ari	Tau	Lib	Ari	Tau	Leo	Vir	Ari	Lib	Aqu	Tau	Ari	Tau	Lib

Mars gives you the get-up-and-go to accomplish. It fires up the spirit, makes one competitive, industrious, and determined to succeed.

You've already seen above the three biggest stock market crashes and both Mars and the Moon were involved because they both directly connected "negative" to the same outer planet. Let's also see the biggest stock gains; or Moon, Uranus, Saturn united by "positive" aspects. Be aware this is just one pattern we are examining; research has shown us there are several patterns operating within the NYSE.

On December 26, 2018, the day after Christmas, the stock market went up 1,080 points (**biggest point gain in history until March 24, 2020**). Remember the TRIP side (left side) has the Moon 120-degs Uranus, and Saturn in the same SIGN as the natal Moon?

May 17, 1792

N.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep	S.N	Ven	Ura	Mar	Moo	Jup	Plu	Mer	Sat	Sun	Nep

You now have a general idea of how this operates. Let's move forward to the present time and answer some more questions about the Stock Market; which will help you determine the extreme ups and downs.

On August 19, 2022, you can clearly see the Stock Market begins another dip down from 34,152 until September 26, 2022 where the market was at 29,422. Let's look why this occurred using the Kerry Theory and math. On August 19th, (see below), transiting Sun was within 3.5-degs of a 90-degree orb of natal Mercury (see below), and transiting Sun was within 3.5-degs of a 90-degree orb of transiting Mars. This gives you "negative" energy; you will be examining only the QUAD side.

Here the energy flow has turned "negative," you need only ask yourself which inner planets are supplying the "negative" energy to what outer planet on the QUAD side. Here both transiting Sun and natal Mercury are 90 and 180-degs to natal Pluto.

Following the Sun "negative" Mars alignment, which lasts until September 4, or a Saturday, then at the opening bell on Monday, you see transiting Mercury 120-degs transiting Mars or "positive" energy. Natal Mars is 120-degs transiting Uranus. Remember only one inner planet must be within 3.5-degs and as you can see transiting Sun is a bit over the 3.5-degs but also moving to the 120-degree orb. The positioning of the transiting Sun is also a clue that this aspect will only be getting stronger as the Sun moves closer to transiting Uranus.

The market went up each day until September 12, then on the 13th the market went dramatically down. Was it due to President Biden talking about the possible rail strike but assured it would be averted, or the Ukrainian forces driving Russians to the border, or Blue Origin's New Shepard rocket failed just minutes after launch, or Queen Elizabeth's death and coffin procession taking place? What made the NYSE change direction?

Could it be possible the transiting Sun's position at 20 **Virgo** at the opening bell of the NYSE, and natal Mars was 18 **Virgo**, within 3.5-degs and both a 180-degs orb of transiting Neptune? Transiting Neptune in Pisces and remember the significance of Gemini, Virgo, Sagittarius and Pisces, as it relates to the natal "negative" side of the NYSE.

Neptune when "negative" always in some way the senses are compromised, unrealistic, or unreliable. There always seems to be an unknown threat lurking. Neptune rules drugs, medicines, painkillers, and alcohol etc., because they affect the senses. Nothing is understood or makes sense during a time frame when Neptune is influencing the populations. That is what is occurring happening right now. Did you notice that President Biden pardoned some people in prison that

"broke the law" and went to prison for selling marijuana on October 6, 2022? This just creates **more confusion** and unrest among the population. President Biden only pardoned federal offenders and expunged their records. Low level (those that maybe were arrested with just 1 oz of pot etc.), or hundreds of thousands of people still remain behind bars. What about those that served their time but a conviction is still on their records which hurts employment and other opportunities. Some are benefited and others are not for the same offense. This is what Neptune brings when it has a "negative" influence.

Just how strong is this particular aspect? Looking below as transiting Neptune just begins to enter the SIGN of Pisces/**Aries** it will be in the same SIGN as the natal Moon, and you already know the natal Moon is 180-degs natal Neptune in the NYSE.

Transiting Jupiter is presently in the SIGN of Aries, and in the same SIGN as the natal Moon and in the natal chart of the NYSE the Moon is 180-degs to natal Jupiter and within the 3.5-degs. Almost all of the ingredients for a disaster but notice that Saturn in Taurus is not joining; but it will from it arrives in Gemini!

On September 28, 2022, the pattern changes. However, I believe the influence started on Sunday 27th and just carried over to Monday. Transiting Mars would have been 120-degs transiting Moon, (positive energy), and natal Mars is 120-degs transiting Uranus, and transiting Moon 120-degs transiting Saturn.

September 28, 2022- **Dow up 548.00**

September 29-30, 2022 - Which complex is operating? Are you getting good enough to determine the answer? TRIP side transiting Mercury (retrograde) 120-degs natal Sun or the QUAD side transiting Moon 180-degs natal Mercury? This brings us up to the end of the month, and I wanted you to see this can be complicated at times, and that you must look closely to see the correct answer.

September 29, 2022

On the TRIP side, the only planet that transiting Mercury could possibly be aspecting beneficially is transiting Pluto but of course this will not operate because natal Mercury is 90-degs natal Pluto. **On the QUAD side**, transiting Moon 180-degs natal Mercury and two things would be occurring; transiting Moon 90-degs transiting Saturn, they are both in the natal chart in the same SIGN. Transiting Moon and natal Mercury are both "negative" 90 and 180-degs natal Pluto, natal Mercury is "negative" to natal Pluto. You can think of this as a river flowing firming in one direction (and comparing this to the natal chart original testimony). It would take a massive block to stop the natural flow.

Right now, as of this writing, without any question with the positioning of the planet Neptune, the market will not be following any logic. The Plunge Protection Team will jump in, as it has in the past, to curb panic selling and with all of the devices they have at hand it might just keep the swings up after each down over the next 2 years.

History has clearly shown us the weakness of the stock market and the **next severe time frame is September 3, 2024** right before the next Presidential Election. You've seen the patterns and studied history. With what is coming down the pike, the stock market as you know it might completely close down.

With the slow-moving Neptune now positioned in place everything might appear to be artificial, certainly unbelievable. As I am about to post this new forecast on my website, I see the NYSE gained almost 1,000 points yesterday (October 13, 2022) while high inflation hits Americans; gas prices are climbing at the pumps, countries are buying radiation pills as the war with Ukraine escalates; not the signs you would expect to see the stock market take off. This is the chart for October 13, 2022 below. The positioning of transiting Sun 120-degs transiting Mars "positive energy" is occurring. You can see natal Mars 120-degs transiting Uranus, and transiting Sun 120-degs transiting Saturn.

The Stock Market is not an investment institution for the American public any longer to save for retirement etc.; it is a gambling establishment. America does not realize the music has stopped playing, the fat lady has sung; anyone with any logic or commonsense knows the US economy does not change 5% in one day; what caused the stock market to suddenly surge was manipulation. Was this Plunge Protection by the Feds in play on October 13, 2022?
