

Explaining How the KTS Software Application Works

Why is a software application necessary? Anyone that has studied astrology knows how difficult it is to analyze all of the different transiting planets, Ascendant, Midheaven, Part of Fortune, and other contact points. Some correct for the movement of the constellations, the shifting of the equinox, and the Moon's position. Some use equal houses or sidereal astrology, and even more methods, which are mind-boggling. The Kerry Theory uses specific, "fixed" rules and math, with fixed influences. No more guessing, ESP, or "gut" feelings required.

How It Works

You will need to position the software application window/s on your computer monitor screen however you like; windows are moveable and resizable. The picture below shows you the layout I presently use. Grids 1 – 4 (the main form), and to the right of the grids, the Rule Data form (a guide to the influences occurring), and further to the right, a .opt file listing called the "Chart Data" form, which shows you all your saved .opt data files. Below the grids, I have WORD open for notes as I go along. You, however, can put anything, or nothing, in its place. Much just depends on the size of your screen.

Double left-click on "Lady Gaga dogs stolen.opt" in the Chart Data form. This chart is the birthdate of Lady Gaga (entertainer and American singer, songwriter and actress). The .opt file is the time frame when her French bulldogs were stolen. This was an "epic event" in her life. The dog walker was shot while walking the dogs. Lady Gaga was in Rome, Italy, at the time, working on a new film. She was heartbroken to hear the news.

Grids 1 and 2 are some of the strongest influences occurring during this time frame. These can be interpreted many ways; and perhaps that is why Astrology over the years has not been considered a science. You had to select what influences you feel are the strongest, and the ones that might be "active" ("inactive" aspects are the same as no aspects).

Grids 3 and 4 will give you the "answer", after you have entered her natal "keys". **What are natal "keys"?** These are the natal inner planet(s) that share the same SIGN as your natal outer planet(s) when you were born. There are two additional rules for those folks having no natal connection (sharing the same SIGN) between inner and outer planets.

One natal "key" in Lady Gaga's chart is natal Pluto in Scorpio sharing the same SIGN as her natal Moon and South Node in Scorpio (left-click on the "Sco" cell under "Pluto" in the 3rd row (the sign row) of grid 4 to see the planets that share the same sign as natal Pluto). Planets in conjunction need direction for the energy to flow. Now left-click on the "Leo" cell under "Moo" in the 7th row (the sign row) of grid 4 to see all the planets currently sharing the same SIGN as transiting Moon (there are none). Then left-click on the "9.62" cell (this row is called the degree row), and you will see the aspects currently made by the transiting Moon. There must be a connection to Pluto or no event will occur.

As the transiting Moon passes over a "negative" alignment with her natal Pluto, it allows the natal sequence in grid 2 to operate (anything in connection to natal Pluto).

On the TRIP side (grid 3), transiting Moon is 120-degrees natal Saturn. This **will not operate** because the Moon in her chart **only relates to Pluto** (shares the same SIGN as Pluto in the natal chart), not Saturn. Having the Moon 120-degrees Saturn on the TRIP side helps her do a good job while making a film in Rome, but this is not the aspect that will leave an "event" mark in her life. Plus, the influence of transiting Moon is fleeting.

SIGN as her natal Mercury in Pisces. So do the same procedure as above and left-click on transiting Mercury (the "Aqu" cell in the SIGN row) to show the planets sharing the same

SIGN as transiting Mercury. Then left-click on Mercury (the "11.95" cell in the degree row) to see the aspects. Transiting Mercury and Jupiter were conjunct and "negative" to natal Pluto. This draws these aspects into play.

S.N	Mar	Nep	Plu	Sun	Jup	Sat	Moo	Mer	Ura	Ven

Now, if you are not familiar with the influences each planet has, then turn to the back of the instruction manual and read the general influences. **Moon "negative" Pluto** indicates serious situations, or grave difficulties with affairs; generally, a loss of control. **Mercury "negative" Jupiter** indicates the thinking processes are flawed, or overwhelmed with any current situation. **Moon** relates to family, or the public at large, or relationships. When "negative" to Jupiter, it can make you overly sensitive or emotional.

The KTS, v1.02 Software Application Package consists of the following files:

- Software Application (for installing)
- Manual (in Adobe PDF format)
